MAINTENANCE GUIDE

Care of fabric upholstery

Regular vacuum cleaning is recommended. Vacuum clean the chair with a furniture brush or wipe it with a clean white cloth or sponge slightly dampened with lukewarm, clean water. Marks and stains should be removed with a proprietary cleaner.

Care of leather upholstery

Wipe with a slightly damp cloth and gently rub dry. A good proprietary hide food should be applied at least once a year and more often if the leather is in a dry atmosphere or close to a heat-source.

Do not remove any plastic parts or attempt to open the seating mechanism. For additional maintenance advice please contact our customer service team or our web site flokk.com.

Care of gas stem

Gas stems should be periodically wiped clean with a cloth and general purpose solvent, then a fingertip of light grease applied.

An EPD (Environmental Product Declaration) is a document that summarises a product's environmental performance. An EPD is based on a life cycle assessment (LCA). The requirements for how an EPD is to be made are specified in the ISO 14025 standard. These standardised methods ensure that environmental information can be compared product by product, regardless of manufacturer, region or country. Our EPDs are third-party verified. The GREENGUARD Gold Certification Standard gives assurance that products designed for use in office environments and other indoor spaces meet strict chemical emissions limits, which contribute to the creation of healthier interiors.

* Based on post consumer recycled PP - Black or Brown. (HÅG Tion and HÅG Celi plastic versions use post consumer recycled PP for seat & back in all colours)

** Valid for all HÅG Tion models
