Swivel armchairs and chairs are measured with a mechanism adjusted in such a way that the seat is as much as it is possible positioned levelly, while the backrest vertically. Swivel armchairs and chairs are measured on their castors, whereas visitor and reception chairs on hard glides. The measurements are approximate and can differ depending on the product configuration.

## A - Total height

For products fitted with a gas lift - it is measured with gas lift's minimum and maximum extension. For products fitted with an additional backrest and headrest height adjustment - it is measured in both minimum and maximum positions of the backrest, headrest and gas lift.

## B - Seat height

Measured at the highest point of the seat. For products fitted with a gas lift - it is measured with absorber's minimum and maximum extension.

## C - Seat height with the burden

Seat measured according to EN standards (with seat burden). For products fitted with a gas lift - it is measured with gas lift's minimum and maximum extension.

## D - Backrest height

Measured from the seat to the backrest upper edge. For products with adjustable backrest height - it is measured in the minimum and maximum position.

## E - Headrest height

Measured from the backrest upper edge to the headrest upper edge. The headrest adjusted in maximum vertical position in relation to the upper and lower edge of the headrest. Measured in the headrest's minimum and maximum position.

## F - Base, frame width

Measured at the uttermost points of the base according to the following figures.

## G - Base diameter

Measured according to the figure underneath.

## H - Seat width

Measured at the uttermost points of the seat.

## I - Backrest width

Measured at the uttermost points of the backrest.

## J - Total width

Measured at the uttermost points. For products fitted with adjustable armrests - it is measured with the armrests slid apart to maximum. For products fitted with armrests with adjustable pads - it is measured with the pads slid apart to maximum.

# Measuring methodology

## K - Seat depth

Measuring the distance between the uttermost point on the seat and the point it touches the backrest (the contact point is determined with a level positioned vertically to the backrest by projecting the S point from the backrest onto the seat) (1). For some shell chairs, where there is no distinct border-line between the seat and the backrest, the depth is measured on the bend halfway between the seat and the backrest (2). For products with additional adjustable seat depth - it is measured with minimum and maximum slide.

## L - Seat (element) length

Measured at the uttermost points of the seat.

## M - Total depth

Measured at the uttermost points. Swivel armchairs and chairs are measured according to the drawing underneath. For products with adjustable seat depth - it is measured with minimum and maximum slide.

## N - Backrest (element) length

Measured at the uttermost points of the backrest.

## O - Armrest height

For swivel armchairs and chairs – it is measured from the seat surface to the armrest upper edge. For armrests with adjustable height – it is measured in the minimum and maximum position. For visitor chairs – it is measured from the floor to the armrest upper edge.

## P - Table top length

Measured at the uttermost points of the table top.

## R - Table top width

Measured at the uttermost points of the table top.

## S - Table frame length

Measured at the uttermost points of the table frame.

## T - Table frame width

Measured at the uttermost points of the table frame.

## U - Table top thickness

Table top (element) thickness is measured.

- Claims must be submitted at the purchase location, on a claims form (which can be downloaded from [www.profim.eu](http://www.profim.eu)), together with a purchase document (invoice or guarantee) and the guarantee certificate, if the certificate in question was issued to the Purchaser.
- Claimed products will be accepted only if cleaned, packaged, and secured against damage in shipping.
- The claimed product should be delivered, along with the documents listed in point 2, to the purchase location. If the claim is rejected, the product is sent back to the purchase location at the cost of the Purchaser.
- The Guarantor shall determine whether the claim is justified within 14 days from the claimed products' delivery to manufacturer (together with claim application). A claims department employee will contact the Purchaser by phone or e-mail in order to determine the date and manner of product repair/replacement. Any doubts related to the claims procedure may be clarified at the phone number + 48 63 289 88 40 from Monday to Friday, 9-15, or at the e-mail address [export@profim.pl](mailto:export@profim.pl). Submitting a claim does not entitle the Purchaser to withhold payment for the product.
- In order to enable the manufacturer to identify the product, the claim notice should include information from the product's LABEL, i.e. the date of manufacture, order number, product number, and configuration. Any tampering with the LABEL will cause the guarantee to become null and void.
- Guarantee period.**  
Refers to the products listed in the current price list and on the website [www.profim.eu](http://www.profim.eu).

- If the product is replaced with another product free of defects or repaired by having one of its parts replaced, the course of the guarantee for such product or element is restarted. The guarantee period is extended by the period in which the Purchaser could not make use of the product.
- If a defect cannot be removed or the removal involves excessive costs, the Guarantor may replace the product with another product free of defects. Any replaced defective products or parts thereof become the property of the Guarantor.
- In case where an identical product is not available, the Guarantor may replace it with another product free of defects and with identical/similar parameters.

- Claims concerning mechanical damage (scratches, dents, abrasions, upholstery soiling, missing parts etc.) will be accepted only if submitted within 7 days from the date of handing the product over to the Purchaser. By the above deadline, the Purchaser should unpack the product and remove the wrapping and protective elements in order to rule out mechanical damage. If reservations are made upon delivery with respect to the delivered product, a damage protocol must be drawn up in the presence of the courier or carrier and sent to the Guarantor together with the claims notice.
- The refusal to hand the product (or any part thereof) over for repair in factory conditions, or preventing repair at the site of the Purchaser, causes the Guarantor to be released from its guarantee obligations and any guarantee claims to be waived.
- The date of product repair at the site of the Purchaser is scheduled by the Guarantor.
- Customized products i.e. chairs covered with fabric provided by the Purchaser and manufactured using technology that is not standard for a given product (such as using another base, armrests, covered by a fabric that is not part of standard offer etc.) are covered by one year guarantee.

- b) damage caused during transport and transloading (does not apply to transport provided by the Guarantor),
- c) failure to observe the recommendations contained in the user's manual, damage to castors, glides or floor caused by the inappropriate choice of available options (e.g. using hard castors on hard surfaces); the proper choice of options does not rule out damages that may be caused by using the chairs on carpets, panels, parquet floors etc. of inappropriate quality or on soiled surfaces (e.g. by sand),

- o) wooden components used in products, if the slight differences occurring in individual elements are claimed; the character of the raw material makes it impossible to precisely determine the final aesthetic effects, defined by the wood colour, shade, and figure,
- p) differences in geometry of plywood shells, which, because of their natural properties, may differ in tolerance of +/- 1.5 degrees,
- r) small variations in HPL colours, in accordance with PN-EN 438 norm.

## GENERAL REMARKS CONCERNING PRODUCT USE:

- 23. The products should be protected against the direct influence of sunrays.
- 24. Leather products should not be placed next to a heater or another heat source. Please observe a minimum distance of 30 cm from the heat source.
- 25. Leather should be maintained using special care products that create a protective layer resistant to water and oil substances.
- 26. Products should be protected against becoming wet.
- 27. The upholstery fabric should be protected against soiling by grease, sweat, lubricants etc. In case of soiling, apply appropriate cleaning agents.
- 28. Avoid exposing upholstery to extensive, focused tension (for example standing on a chair) that can result in splitting or a rip of stitching as well as mechanical damage to upholstery.
- 29. Upholstered furniture is supposed to be used to sit evenly on the seat surface to avoid natural tendency of fabrics and leather to creasing and wrinkling due to ongoing pressure, temperature and the moist of the body (wrinkling and creasing is not a product fault but a natural effect; the bigger the upholstered surface the higher tendency for this effect to occur).
- 30. Products should be dusted at least once a week.
- 31. Hard castors are used with soft carpeting and carpets.
- 32. Soft castors are used with hard floors (e.g. PVC, parquet floors, floor panels).
- 33. Remarks concerning the use of products containing plywood elements:
  - temperature range from +15°C to +30°C,
  - humidity range from 40% to 65%.
- 34. Ceramic tops meet the frost resistance requirements per EN 10545-12.
- 35. Table Chic RH and RR with metal and ceramic table top (apply only when frame/column is made of EPO1, EPO2, EPO3, with hard or teflon glides) can be for outdoor use according to EN 12944-2 cat. C3.
- 36. Plastic elements of the products like bases, armrests cover (especially light grey colours) require regular cleaning adequate to density of usage.
