Glides

Standard:

- teflon glides - universal.

Option:

- felt glides - for hard floors.

When ordering please clearly indicate the chosen option.

Table top G1 - lead time 20-30 working days.

Option of mixing colours of the same fabric on cushions and shell according to below scheme:

A - inner shell part, B - outer shell part.

In case of order of such option, following example should be specified: SC-67097/SC-60132 (where SC-67097 - A, SC-60132 - B). Option is available at no extra charge.

Set of linking parts for stabilizing adjoining elements as standard.

In bigger models, differences resulting from the hardness of polyurethane cold-moulded foam due to parameter variations within the range of +/-10% (as acceptable according to the DIN 53576/ISO 2439 norm) can be noticeable.

For better set-stability, it is possible to join the screens with linking parts:

- 1CW - option of joining from the right, left or both sides of the screen.

- 2BW - option of joining from the right, left or both sides of the screen.

- 2LW - option of joining only from the right side of the screen,

- 2RW - option of joining only from the left side of the screen.

- 3BW - option of joining from the right, left or both sides of the screen,

- 3RW - option of joining only from the left side of the screen.

- 3LW - option of joining only from the right side of the screen.

Please indicate clearly on your order which joining option is required.

It's not possible to assemble the screen with the armchair/sofa without preparing it at the manufacture stage.

The seat and screen can be in different price groups.

Consumption of fabric and leather

The quantities below are only estimated. The real quantity of fabric- or leather-consumption may vary in accordance to the quantity of pieces on order. Please notice that before we accept any order in customer's own material we need to make sample trials. Please be aware that not every type of fabric/leather is suitable for upholstery. Volume of customer's own material must be agreed each time with Profim sales organization

Column A - Estimated consumption of fabric (roll width: 1,40 m)

Measuring methodology

Swivel armchairs and chairs are measured with a mechanism adjusted in such a way that the seat is as much as it is possible positioned levelly, while the backrest vertically. Swivel armchairs and chairs are measured on their castors, whereas visitor and reception chairs on hard glides. The measurements are approximate and can differ depending on the product configuration.

A - Total height

For products fitted with a gas lift - it is measured with gas lift's minimum and maximum extension. For products fitted with an additional backrest and headrest height adjustment - it is measured in both minimum and maximum positions of the backrest, headrest and gas lift.

B - Seat height

Measured at the highest point of the seat. For products fitted with a gas lift - it is measured with absorber's minimum and maximum extension.

C - Seat height with the burden

Seat measured according to EN standards (with seat burden). For products fitted with a gas lift - it is measured with gas lift's minimum and maximum extension.

D - Backrest height

Measured from the seat to the backrest upper edge. For products with adjustable backrest height - it is measured in the minimum and maximum position.

E - Headrest height

Measured from the backrest upper edge to the headrest upper edge. The headrest adjusted in maximum vertical position in relation to the upper and lower edge of the headrest. Measured in the headrest's minimum and maximum position.

F - Base, frame width

Measured at the uttermost points of the base according to the following figures.

G - Base diameter

Measured according to the figure underneath.

H - Seat width

Measured at the uttermost points of the seat.

I - Backrest width

Measured at the uttermost points of the backrest.

J - Total width

Measured at the uttermost points. For products fitted with adjustable armrests - it is measured with the armrests slid apart to maximum. For products fitted with armrests with adjustable pads - it is measured with the pads slid apart to maximum.

Measuring methodology

K - Seat depth

Measuring the distance between the uttermost point on the seat and the point it touches the backrest (the contact point is determined with a level positioned vertically to the backrest by projecting the S point from the backrest onto the seat) (1). For some shell chairs, where there is no distinct border-line between the seat and the backrest, the depth is measured on the bend halfway between the seat and the backrest (2). For products with additional adjustable seat depth - it is measured with minimum and maximum slide.

L - Seat (element) length

Measured at the uttermost points of the seat.

M - Total depth

Measured at the uttermost points. Swivel armchairs and chairs are measured according to the drawing underneath. For products with adjustable seat depth - it is measured with minimum and maximum slide.

N - Backrest (element) length

Measured at the uttermost points of the backrest.

O - Armrest height

For swivel armchairs and chairs – it is measured from the seat surface to the armrest upper edge. For armrests with adjustable height – it is measured in the minimum and maximum position. For visitor chairs – it is measured from the floor to the armrest upper edge.

P - Table top length

Measured at the uttermost points of the table top.

R - Table top width

Measured at the uttermost points of the table top.

S - Table frame length

Measured at the uttermost points of the table frame.

T - Table frame width

Measured at the uttermost points of the table frame.

U - Table top thickness

Table top (element) thickness is measured.

SYNERGY (CAMIRA) - PRICE GROUP 3

Epitomising natural simplicity, Synergy is a wool rich fabric which is at once both irresistibly soft and ultra-high performing. Delicately felted, with a beautifully relaxed drape, the understated aesthetics showcase the intriguing coloration of this considered textile.

Composition:

- 95% wool
- 5% polyamide
- **Weight:** 400 g/m²

Certificates:

- **Abrasion resistance:** 100000 Martindale cycles (BS-EN ISO 12947-2)
- **Pilling resistance:** 4 (BS-EN ISO 12945-2)
- **Flammability:** cigarette (BS-EN 1021-1)
- **Flammability:** match (BS-EN 1021-2)
- **Flammability:** (UNI 9175 Class 1IM)
- **Light fastness:** 5 (ISO 105-B02)
- **Maintenance:**
 - -vacuum regularly
 - -use dry-clean preparations
 - -do not bleach

Because of the fact that the fabric Synergy is composed of 95% natural fiber, each of the batches shows variations in shade, which may be visible in products of follow-up orders. Additionally, an inherent feature of all natural fibers is the tendency to delicate fabric pilling.
