

flokk

Creating better workplaces

Catalogue 2024

Our vision is to Inspire Great Work

We believe in people putting all their hearts and minds into their work. With our passion for furnishing, we contribute to others fulfilling their potential.

Furniture from Flokk should inspire people to perform better, and we also want to inspire our customers and partners when working with Flokk through our knowledge of modern workspaces.

At Flokk we make sure people are properly seated in every kind of professional and public environment. Based on our sustainable design principles, we manufacture a wide range of chairs, sofas, benches, stools, spatial solutions and other office furniture.

Across our selection of distinguished brands, we provide each customer with industry leading flexibility, service and expertise.

Our aim is to create high-quality seating with a significantly reduced carbon footprint passing on emission reductions to our customers looking to lower their own environmental impact.

We offer a complete seating solution

A diverse range of brands for every workspace need

We understand that a truly productive and inspiring workspace requires more than just functional furniture – it demands a tailored and holistic seating solution. That’s why we take pride in our diverse portfolio of brands, each with a unique identity, rich heritage and diverse product offerings.

Whether you’re seeking sophisticated ergonomic designs or versatile seating solutions, for collaborative environments with multiuser chairs or personalised seating for individual needs, Flokk’s range of brands ensures that you find the perfect fit for every workspace requirement.

HÅG est. 1943

Celebrating movement

HÅG aspire to simplicity, combined with pioneering functionality, so people get the best sitting experience imaginable. Merge of elegance and usability creates appealing, effective designs that makes HÅG ideal for modern offices. HÅG inBalance® ensures continuous movement while seated – keeping you extra alert throughout a long workday.

OFFECCT est. 1990

Furniture with a mission

Offecct works with the world’s leading designers to develop durable furniture that inspires creativity. Unique design for inspiring encounters - at home, in the office and in public spaces.

PROFIM est. 1992

Essential for workspaces

Profim’s brand philosophy is: ergonomics, technology and aesthetics are essential for true seating comfort. For 30 years, Profim has been producing professional seating solutions that meet the highest demands in terms of design, quality, functionality & reliability.

GIROFLEX est. 1872

Designed to Work

First Class quality, and craftsmanship built on Swiss legacy dating back to 1872. Giroflex invented the world’s first patented swivel chair, the „Federdreh“ (Spring swivel), and are still a pioneer for ergonomic and ecological standards today.

RH est. 1976

Designed for human performance

RH chairs are a unique blend of design and ergonomic function, where the users need for movement, comfort and support always is the top priority.

CONNECTION est. 1997

Space that works

Established in Huddersfield in 1997, Connection is a British brand with British manufacturing at its heart. Grown to a large-scale, established designer and manufacturer of a diverse collection of intelligent furniture products.

We create high-quality furniture

Rigorously tested, precision engineered designs

The craftsmanship invested in every design process is carefully translated into efficient manufacturing, utilising advanced automation and industrialisation to ensure a consistent quality experience. This attention to detail extends to our logistics and customer service, guaranteeing high-quality experiences for our customers.

Our unwavering focus on precision, tactility, force feedback, and noise significantly influences users' quality perception. Customizability and flexibility in our solutions allow us to align seamlessly with our clients' values and preferences.

Find your Showroom: www.flokk.com/global/support/contact-us

Below: Designer David Trubridge in collaboration with Offect.

Local Supply chains

Our manufacturing footprint extends across continents, with primary facilities in Scandinavia, Poland and the United Kingdom. These regional hubs position us near key European markets, fostering closer customer relationships and enabling agile responses to market dynamics, ensuring low lead times and rigorous quality control.

Production sites in the United States and China serve as essential pillars in our expansion into emerging markets, allowing us to be more responsive to local markets.

Our commitment to sustainability aligns seamlessly with our manufacturing strategy. By reducing cross-continental transportation, we've minimized our carbon footprint and reduced transport costs, benefitting both the environment and our finances.

What makes Flokk the best sustainable seating partner?

Seating solutions helping lower your carbon footprint

We are deeply rooted in our commitment to environmental, social, and economic viability. These principles are woven into the fabric of our company, inspiring us to develop sustainable solutions that foster positive impacts on our planet, our communities and our valued customers.

Reduced climate impact

Our aim is to create high-quality seating with a significantly reduced carbon footprint - emission reductions, which we pass on to our customers looking to lower their own environmental impact.

Our holistic approach takes into consideration every aspect of the environment - from the materials we use to the way we manufacture our designs, the conditions our employees work in, and the full lifespan of our products.

Every new Flokk design must stay true to our longstanding principles for sustainable design, which encompass every aspect of environmental consideration, ensuring the health and prosperity of our furniture users, our employees and the natural world.

The result of this approach is furniture with a substantially lower carbon footprint than average, without a reduction in quality, comfort and performance.

Flokk's principles for sustainable design

1. low weight
2. few components
3. correct choice of materials
4. long lasting life
5. easy to disassemble

These five circular design criteria are built around three focus areas where we see we can have the biggest impact.:

- I Climate: smallest possible carbon footprint
- II Resources: reduced use of non-renewable resources
- III Health: elimination of toxic chemicals

Our Eco-Range: »EPD-Available«

Helping you to make the most sustainable choice

We want to make it easy for you to specify ecofriendly products within our Portfolio. Throughout this brochure you will find products marked with a green leaf symbol – this is an indication that these products have been EPD certified.

EPD – Transparent environmental performance

An EPD is a third-party verified document that quantifies environmental information on a product's life cycle. It provides data on carbon footprint, chemical use, and recycled materials, similar to a nutritional label for food. Flokk was also among the first office furniture companies to receive an EPD, in the year 2004. Currently, we have more than 40 EPD-certified product families and continue to expand our certification.

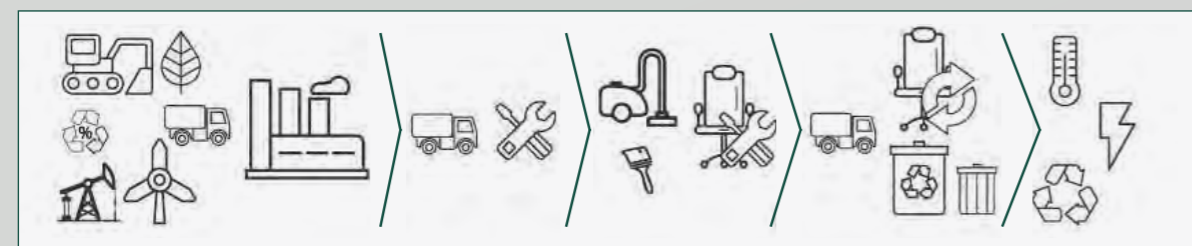

EPD-certified product families of Flokk Brands

Additional certification across entire portfolio

Alongside our eco-choice range, many other products have environmental certification, including GREENGUARD Gold, EU Ecolabel and Möbelfakta, to name a few. You will find details on certification on each product.

What includes an EPD calculation?

A1 – A3 Product Stage

- A1: Production of input materials for the product
- A2: Transport of raw materials
- A3: Manufacturing of the product

A4 – A5 Construction Stage

- A4: Transport to market
- A5: Installation

B1 – B7 Use Stage

- B2: Maintenance
- B3: Repair
- B4: Replacement

C1 – C4 End of life

- C1: De-construction/Demolition
- C2: Transport to waste processing
- C3: Waste processing
- C4: Disposal

The environmental impact per product we present is based on EN15804+A1:2013 Cradle to gate/A1-A3 stages, is mainly without packaging and are calculated in August 2023. Flokk has started using the new standard for EPD calculations, EN15084+A2:2019 Cradle to cradle/A1-D stages, which will affect all new environmental data presented going forward.

We design for health and wellbeing

A holistic approach ensuring positive user experiences

We create furniture that provides a positive and healthy experience for every user. With a diverse range of brands, we cater to various ergonomic philosophies, ensuring a suitable design for every individual's preferred way of sitting. Despite this, there are several universal factors for how we design every flokk piece of furniture.

Movement and variation

Our furniture excels in encouraging dynamic sitting, offering various ways to embrace movement to ensure a healthier and more active lifestyle. Promoting movement and posture variation throughout the workday is essential to prevent the effects of sedentary behaviour and maintain wellbeing.

Comfort

We aim to deliver tailored comfort to meet diverse needs and specific requirements, depending on the situation. This ensures a satisfying experience, allowing users to maintain concentration and focus as well as relaxation.

Usability

Not understanding how something works is frustrating. We work hard to make all of our designs intuitive and provide simple instructional guides to make sure that any potential problems are met head on. Whether it is a task chair, a meeting chair or a sofa, we want our users to instinctively feel its purpose.

Inclusive design

Our products are thoughtfully designed to be adaptable, adjustable, and suitable for all individuals, regardless of physical size, age or special needs. We prioritise ensuring that each user group not only can use our products but also understand and enjoy them. Some chairs are tailored for multiuser environments, while others offer extensive personalisation and advanced adjustments.

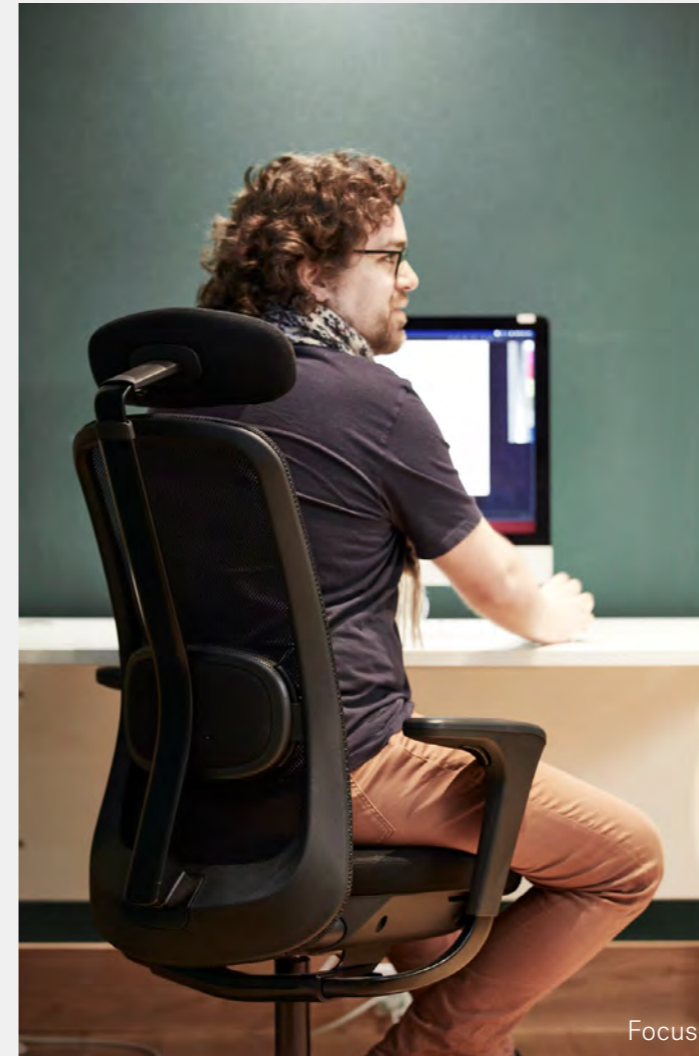

Furniture for every workspace need

Improving productivity, fostering creativity and shaping the culture.

Designing attractive and healthy workspaces is more important than ever to meet the challenges of a digitally connected, distributed workforce. We believe people should be able to work where they feel they can perform best, in experience rich environments that enhance the organisations culture and creates a sense of community and belonging.

The office, where a majority of the work is done, traditionally performs three roles – to improve productivity, foster creativity and shape an organisation’s culture. For this to happen it needs to provide three types of environments – a place to focus, collaborate and connect.

Based on our sustainable design principles, we manufacture a wide range of chairs, sofas, benches, stools, cushions and other office furniture, suitable for the full range of public and professional workspace needs enabling every individual to perform at their best.

Focus	Collaborate	Connect
Personal workspaces Booths Library Open workspaces etc.	Small/large meeting rooms Conference rooms Project rooms Open workspaces Touchdown spaces etc.	Social spaces Canteen Touchdown spaces Lobby etc.

Connect ■

Spaces to focus

Environments for individual, desk-based tasks

Focus work is uninterrupted, quality time spent on important high-impact tasks. It's about getting things done. Providing the right chair is an essential element of designing focused workspaces. Chairs are central in providing comfort, and can contribute to a feeling of security and safety. The right chair can also be so much more, a healthy platform for employee wellbeing, complementing interior design schemes and play a part in establishing a strong and positive company culture. A range of Flokk chairs feature advanced ergonomic principles, designed to support workers across the whole working day, with several key advantages:

Movement and variation

Staying active at work helps improve overall wellbeing. Even when seated, we design solutions for movement, working with natural body rhythms to reduce the effects of sedentary behaviour.

Personalised seating

From multiuser touchdown zones for short bursts of productivity, to highly personalised workstations for round the clock usage, we have a depth of solutions to cover all focus workspaces.

Intuitive use

Flokk makes easy to use furniture. We want people to instinctively feel how a chair works. Our design language includes simple to operate, universally understood controls, with minimal fuss and maximum control.

HÅG Capisco

Designed by Peter Opsvik

With elegant curves and smooth performance, the distinct shape stands out from other chairs, adding personality to any environment. HÅG Capisco's timelessness has elevated it from being a favourite in Scandinavian design, to a world renowned design object. HÅG Capisco is a fully versatile and customisable chair. The flexibility in dressing it means it never looks out of place, whether in the office, meeting room or somewhere totally unexpected.

WORKSPACE RECOMMENDATION

- Focus (Personal workspaces)
- Collaboration areas (creative meeting rooms)

The original HÅG Capisco is ideal for design conscious people who sit for many hours at a time, or want the comfort of a fully upholstered chair. The flexibility in use makes it a perfect fit for creative meeting rooms and collaboration areas. Its shape allows you to twist and turn to face your peers.

CONFIGURATION OPTIONS

The unique shape of the chair and the many colour options, add personality and energy to any room and work place. Three different metal colours, three different lifts (150, 200, 265 mm lift). We recommend the optional 265 mm lift if you want to work with a desk in a high position. Optional extra: HÅG FootRing, headrest and chair hanger (for 8106 and 8126).

HÅG Creed

Designed by Peter Opsvik

The HÅG Creed builds on the best from two original ground-breakers, the HÅG H04 and HÅG H05, by legendary designer Peter Opsvik. It combines classic design with smart functionality, is user-friendly, and features our unique centre-tilt mechanism - HÅG inBalance®. The ingenious "4-in-1" adjustment wheel allows you to easily personalize the HÅG Creed by regulating the seat depth, backrest height and tilt-resistance, all in one simple movement.

WORKSPACE RECOMMENDATION

- Office spaces (task chair)
- Personal workspaces
- Meeting rooms

HÅG Creed is ideal for office spaces, personal workspaces, and dynamic meetings. It elevates your workspace experience effortlessly, with optimized comfort and focus.

CONFIGURATION OPTIONS

All models can be upholstered in textiles from the Flokk standard-, extended and curated collections. Armrests are optional and may be supplied with padded leather tops for extra soft tactility and exclusive touch. The HÅG SwingBack armrests have been redesigned to be squarer and more clean-cut, yet still enable a smooth transition between different positions. Optional extra: HÅG FootRing and headrest.

HÅG SoFi Collection

Designed by Flokk design team, Aleksander Borgenhov and Frost Produkt

The HÅG SoFi is the ultimate task chair, designed with both style and functionality in mind. Despite its warm and welcoming appearance, it's packed full of smart features, making it ideal for both individual and multi-user working environments. Its user-friendly design and easy adjustability ensure a perfect fit every time, while its continuous energizing support keeps you comfortable and focused throughout the day. HÅG SoFi mesh with its soft and comforting mesh structure provides excellent ventilation and captivates with a semi-transparent effect. Whether at your own desk or in a shared workspace, HÅG SoFi collection is the perfect choice for those who demand both style and performance.

WORKSPACE RECOMMENDATION

- Office spaces (task chair)
- Collaborative spaces

The HÅG SoFi and HÅG SoFi mesh are user-friendly and uncomplicated chairs that inspire new ways of working and collaborating, that suits most people, and fits in anywhere.

CONFIGURATION OPTIONS

RH Logic (200/220)

Designed by Jonas Stokke & Øystein Austad and the Flokk Design Team

The way we work depends on who we are, what we do and when we do it. But one thing that unites us is the need for wellbeing during long hours by the desk. The new and improved RH Logic is a natural choice for lasting individual comfort. By adjusting smoothly to your body and providing crucial support and relief, it helps you stay focused on getting things done - no matter who you are, what you do or when you do it.

WORKSPACE RECOMMENDATION

- Spaces to focus (personal workspaces, open workspaces, touchdown areas)
- Collaborative spaces (Meeting rooms)

Individual fit for all users. Excellent support for the entire back in upright posture and active seating. The RH Logic is easy for the user to adjust and operate. The controls are visually prominent and encourage the users to optimize personal settings.

CONFIGURATION OPTIONS

RH Logic 220 is available with two different back options: medium or large. It comes standard with castors suitable for soft floors and features black plastic and black aluminum parts. The chair can be enhanced with a wide range of options and accessories, including a neckrest, armrests, and a gas stem for different seat heights. Various seat options, such as XL and coccyx, are also available.

RH Mereo

Designed by Veryday and the Flokk Design Team

A Scandinavian sensation - designed for you. Uncompromising ergonomics combined with innovation and design. The office chair RH Mereo helps you to achieve an active sitting position, better concentration and better performance. RH Mereo is perfect for workplaces where several people use the same office chair.

WORKSPACE RECOMMENDATION

- Spaces to focus (personal workspaces, open workspaces, touchdown area)
- Collaborative spaces

Intuitive handles and a clean shape makes it easily adjusted to personal needs and preferences.

CONFIGURATION OPTIONS

RH Mereo has three back options: medium, large curved back, and it comes standard with castors suitable for soft floors. It is available in three color variants: black, silver, and light grey. The user-friendly levers for adjustments have intuitive shapes and placements. Additionally, it can be enhanced with various options and accessories, including a neckrest, armrests, and a gas stem for different seat height.

RH Secur24

Designed by Flokk Design Team

RH Secur24 is the ultimate chair for observation and monitoring. Thanks to robust construction and easy-to-reach controls, the chair is easily adapted to users of different length and weight, and ready for constant use during continuous shifts. The ergonomically shaped backrest and extra thick seat cushion can be adjusted in both depth and height for maximum support. Furthermore, the adjustable pelvic support helps provide good posture for all users. Available in two models: RH Secur24 and RH Secur Exclusive.

WORKSPACE RECOMMENDATION

· Spaces to focus (observation, monitoring, 24/7 heavy use areas)

When choosing chairs for continuous use, particularly in 24/7 work environments, it becomes essential to give priority to comfort, durability, and ergonomic design. RH Secur24 is engineered to endure prolonged usage in diverse settings like call centers, control rooms with observation.

CONFIGURATION OPTIONS

Provided with a tilting mechanism for dynamic seating, the seat of the chair follows your seating position. All controls are easily accessible on both sides of the chair and adjustable for individual needs. Base in polished aluminium 710 mm and castors for hard floors. Available in two models: RH Secur24 and RH Secur24 Exclusive (with extra comfortable seat & back incl. seatslide).

PROFIM Accis^{Pro}

Designed by ITO Design

Accis^{Pro} is renowned for its modern aesthetics, lightweight design, and, most notably, its ergonomic excellence. Unlike chairs that restrict the body to a fixed position, Accis^{Pro} features an innovative mechanism that dynamically supports the spine, shoulders, arms, and lumbar region, adapting to the user's micro-movements while working at the desk. With two patented solutions, Accis^{Pro} stands as Profim's pinnacle of advanced task chairs, providing unparalleled support and comfort for the ultimate working experience.

WORKSPACE RECOMMENDATION

- Personal workspaces
- Open workspaces

Accis^{Pro} integrates into modern office spaces while also catering to the needs of hybrid work environments. Its versatility extends beyond professional settings, making it an excellent choice for home offices, homeschooling setups, and college environments. With its focus on user comfort and active seating, Accis^{Pro} ensures a supportive and comfortable experience across various settings.

CONFIGURATION OPTIONS

Available in many options with backrest mesh and 2 types of bases: plastic in 2 colours and aluminum in 3 colours. Lumbar support and headrest are an option. Headrest can be bought separately for self-assembly.

PROFIM Trillo^{Pro}

Designed by ITO Design

Trillo^{Pro} is a modern and sleek task chair that embodies an elegant and minimalist design. It offers good comfort, making it an ideal choice for contemporary hybrid office spaces. With its minimalistic aesthetic, Trillo^{Pro} complements the modern work environment perfectly. Additionally, its easy and quick assembly, thanks to the small number of components, adding to its convenience. Trillo^{Pro} is accompanied by the Trillo^{Pro} hocker, a chair specifically designed for high table tops.

WORKSPACE RECOMMENDATION

- Open workspace and touchdown areas
- Collaborative spaces

Trillo^{Pro} seamlessly integrates into modern offices, conference rooms, and is well-suited for hybrid work and co-working environments. Its versatility extends beyond the workplace, making it an excellent choice for home offices, homeschooling setups, or college settings. With its ergonomic design, Trillo^{Pro} prioritizes the well-being of the user's spine, providing optimal support and comfort.

CONFIGURATION OPTIONS

The Trillo^{Pro} chair features a mechanism that allows for full seat adjustment, ensuring optimal customization to the user's needs. Its synchronous mechanism enables the backrest to recline in a 2:1 ratio with the seat, with the ability to lock the desired angle in 5 positions. Additionally, the chair offers locking in the working position and height adjustment, facilitating proper posture and optimal seat height for comfortable work.

Spaces to collaborate

Environments for dynamic group activities

Collaboration is people working together. It is about creating synergies within and across departments to think creatively and foster innovation. Providing the right chair is an essential element of designing collaboration workspaces. How people sit can significantly affect the way people interact and communicate with each other. Appropriate seating must be intuitive, encouraging instant recognition of their purpose and strengths, helping businesses to meet the expectations and needs of their employees in creating effective collaborative spaces.

Movement and variation

Workshops, brainstorming and creative sessions benefit from active people. Our chairs encourage dynamic and expressive participation, keeping everyone engaged in conversations and information flows.

Agile and accommodating

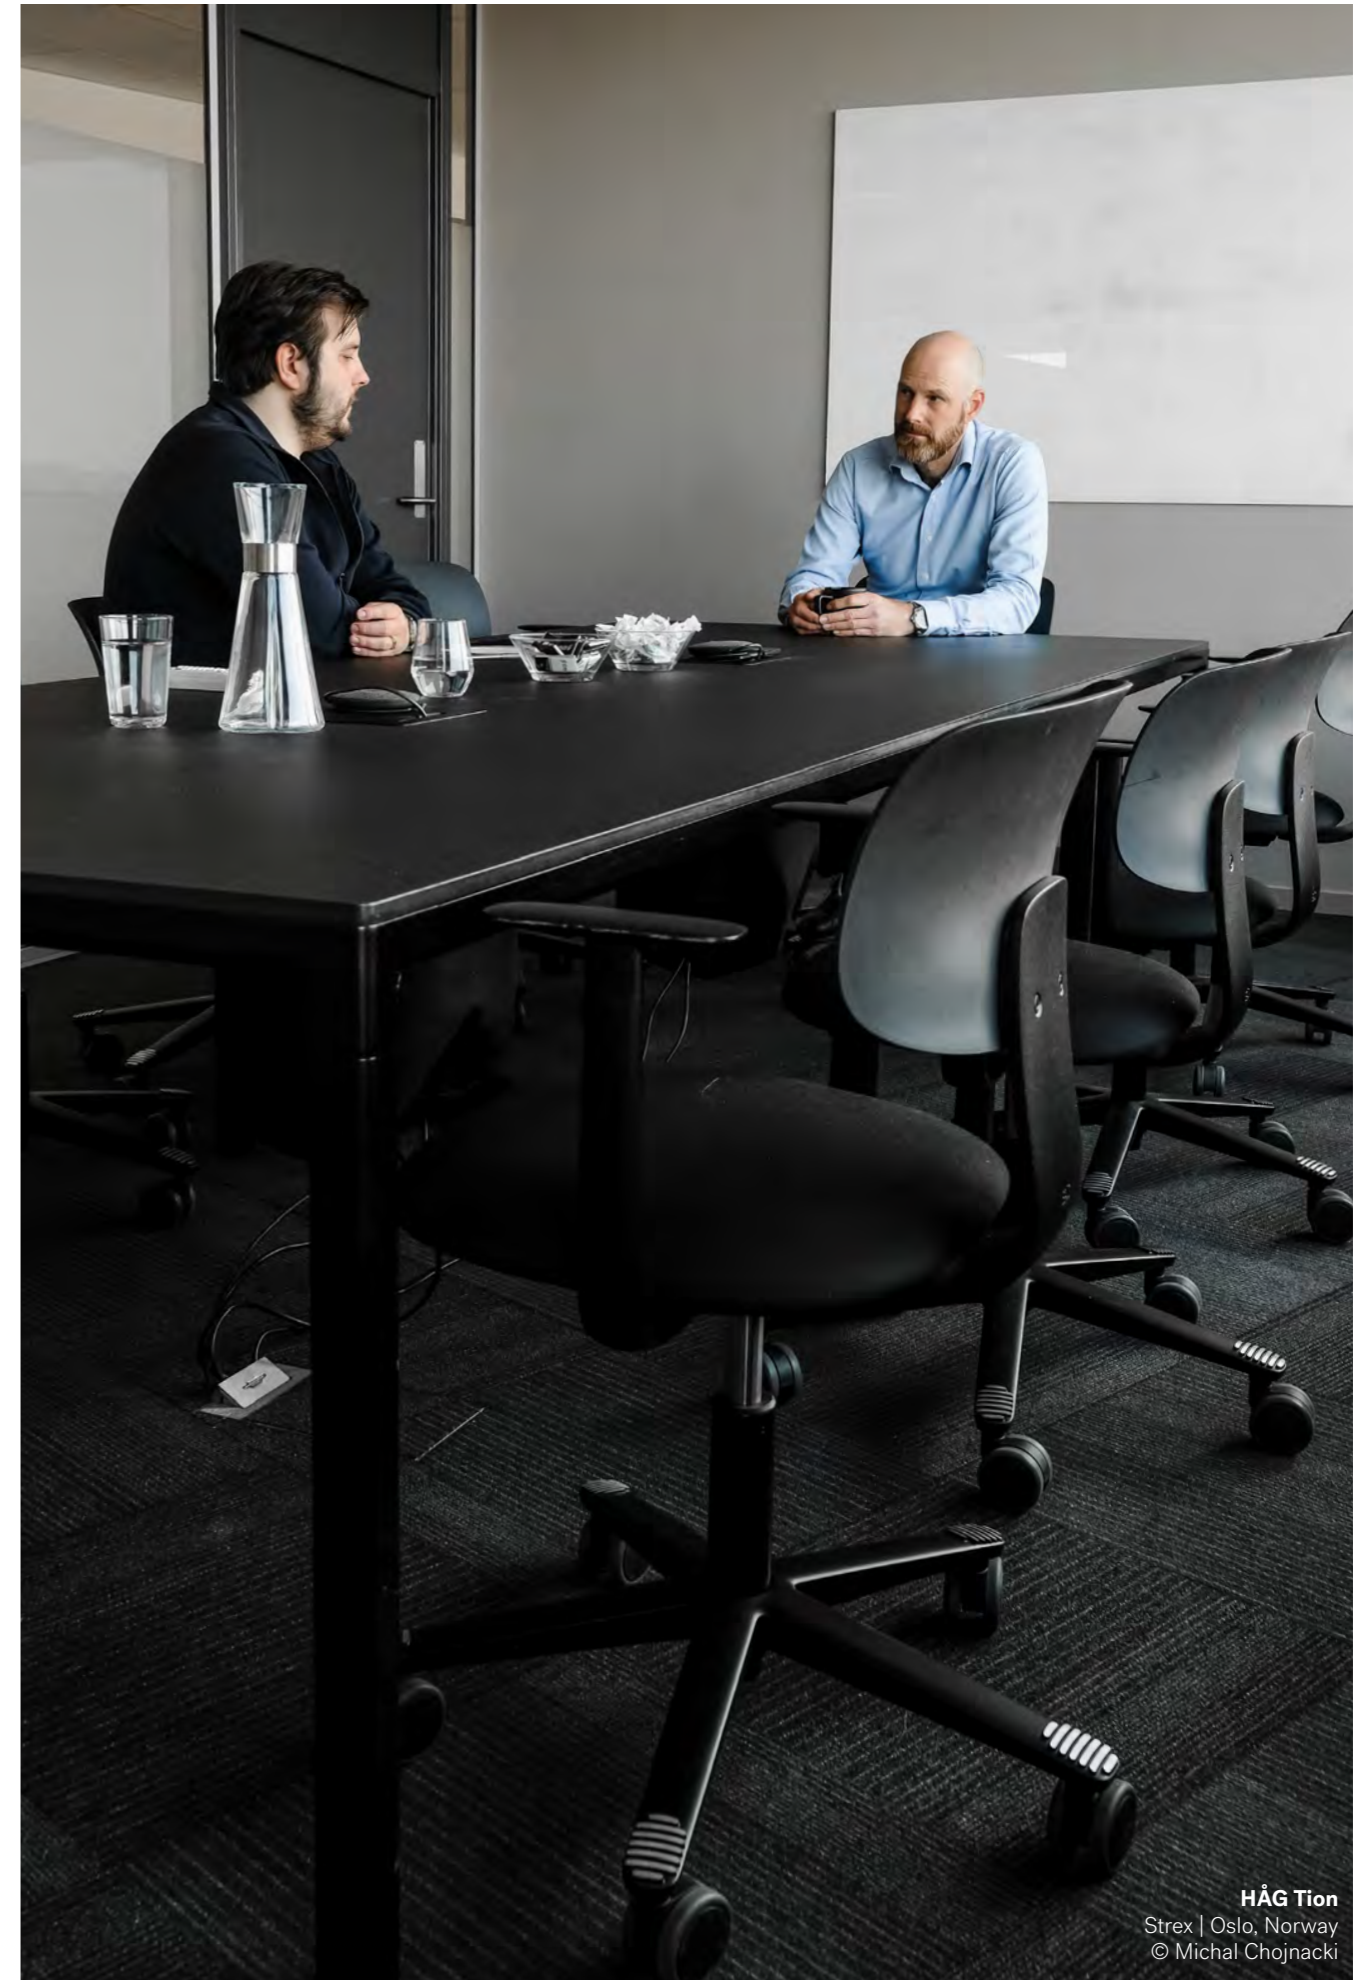

Flexibility is crucial when it comes to collaborative spaces. Our high quality compact designs are lightweight, easily stackable and multi-purpose, including unique designs perfect for ever-changing places.

Customisable

Almost every design is completely customisable, with a near limitless choice of colours, fabrics and finishes to match your interior aesthetic, as well as a variety of leg and base options, allowing you to create the exact chair you need.

Highlighted Products:

- Chairs for collaborative spaces
- Stackable chairs
- Tables for meeting rooms and conferences

HÅG Capisco Puls

Designed by Peter Opsvik

The HÅG Capisco Puls provides you with all the benefits of the HÅG Capisco, except that it's lighter. For lively environments such as creative workplaces, it's a versatile choice. It's easy to wipe down, and like the HÅG Capisco, perfectly suits height adjustable desks.

WORKSPACE RECOMMENDATION

- Focus (Personal workspaces, home offices)
- Collaboration areas (Meeting and touch down areas)

With its light, edgy-shaped back and seat, the HÅG Capisco Puls is an ideal solution for work spaces where you sit for shorter periods of time, like meetings, touch-down areas, home offices and collaboration areas.

CONFIGURATION OPTIONS

Available in nine plastic colours: Black, White, Light Grey, Clay, Moss, Blueberry, Rosehip, Sand and Brown. Brown is made of recycled PP from snow plough markers. Four different metal colours, three different lifts (150, 200, 265mm lift). Optional extras: HÅG FootRing and chair hanger (for 8010 and 8020).

GIROFLEX giroflex 150 (Limited)

Designed by BIG-GAME

Designed in collaboration between Giroflex, BIG-GAME, and Karimoku New Standard, the giroflex 150 is a contemporary interpretation of the classic wooden office chair. It celebrates natural materials and pays homage to Giroflex's design heritage. Crafted oak components are supported by a flexible steel structure and Giroflex's engineered synchro motion mechanism. The giroflex 150 prioritizes simplicity and forgoes adjustable features. Instead, it naturally adapts to the sitter's weight and dynamically responds to their movements, showcasing the sophistication of Giroflex's engineering.

WORKSPACE RECOMMENDATION

- Meeting and touch down areas
- Workshop spaces
- Home Offices, Collaboration areas.

Functionally and aesthetically suited to both home and office work environments, as well as meeting the sustainability expectations of the present day, the giroflex 150 looks to the future while honoring the past.

Offecct Phoenix

Designed by Luca Nichetto

Phoenix Chair Every piece is carefully conceived, thought through, purposefully designed and crafted for a long, sustainable and flexible life cycle. The fruit of this development process is a chair of original elegance and contemporary timelessness. Phoenix is derived from a recycled aluminum frame with a trademark Y-shaped base. The upholstered parts can be easily removed and replaced when needed — or when the client wants a new color or material for novel functions and/or styles. The result is a brand new chair whose used parts are recycled. Phoenix Table has a slender shape that captures the expressions of the chair in a distinct but subtle way. The length is flexible and can be adjusted by adding extra inserts.

WORKSPACE RECOMMENDATION

- Collaborative spaces
- Spaces to connect

Whether you're designing an individual workspace, collaborative areas, or a conference room, the Phoenix chair is a versatile solution. It can be seamlessly integrated into various settings, offering both comfort and sophistication. You can play with the arrangement, from standalone units to group seating or lining them up along a Phoenix conference table, enhancing the functionality and aesthetics of any space.

Spaces to connect

Environments for informal and social meetings and events

People don't come together just to work – but to connect. Connection is all about interacting with other employees in spaces designed not just for work, but to make people feel comfortable, relaxed and at home in the workplace. Providing the right seating is essential when designing spaces to connect. How comfortable people feel is directly related to the chair they are sitting on, which in turn can influence intimacy and engagement. Comfortable seating options such as sofas, lounge chairs and bean bags can create a relaxed and inviting atmosphere that encourages casual conversation and socialising. Providing a variety of seating options can cater to different preferences and needs, helping to create a more inclusive and welcoming environment for all employees.

Modular designs & complete customisation

We manufacture our furniture made to order, tailored to your needs. Modular soft seating allows for complete customisation, from one piece to a dozen, designed to work together no matter what sized space. Customised fabric choices and personalised stitching is available on many of our products.

Modern colour palettes, materials and textures

Our curated standard & extended range of fabrics feature a depth of warm and welcoming colours and textures. Our team are happy to find the right materials for your spaces – matching any corporate needs.

Industry leading flexibility, service and expertise

Our products are built to last, with many guaranteed up to five years. And when they do need some love we have an extensive network of authorised dealers with a range of service options, spare parts and repairs – covered under warranty.

Highlighted Products:

- Sofas & modular sofa systems
- Lounge chairs
- Benches, stools, pouffes
- Acoustics
- Room dividers
- Tables (for sofa groups etc.)

Offecct Ezy

Designed by Christophe Pillet

Ezy chairs is a comfortable and timeless collection, which consists of a easy chair, a barstool. Though, originally designed for the famous Pullman Paris Eiffel Tour Hotel. The collection offers ways to enjoy its comfort be it in a meeting, at a bar, at home or in an office. "Instead of making something strange, visible and loud, I wanted to make something very normal, simple and elegant." Christophe Pillet.

WORKSPACE RECOMMENDATION

- Spaces to focus
- Collaborative workspaces
- Spaces to connect

„The purpose of the Ezy collection was to make a super functional, normal and long lasting design”, says Christophe Pillet.

CONFIGURATION OPTIONS

Ezy comes in many types of design. Ezy low, -high, 4-castors frame or 5-castor frame. Wood base or ledge, or 4 leg in RAL colors or as a bar stool.

OFFECCT Hanger

Designed by Neri & Hu

The concept for Neri&Hu's Hanger is to create a new kind of furniture for people who like to hang their garments and accessories out in the open in a room, in plain sight, rather than concealed in a closet or wardrobe. It is a sign of respect for the garments, but also motivated by hygienic reasons – to air the garments out after a day's wear in, for example, a hotel room. "We are always interested in seemingly mundane and anonymous everyday objects. This hanger represents an object that is neglected and ignored in domestic and office environments — not glorified at all but in fact among the most important. It doesn't crave attention but adorns grace, beauty and usefulness to the household", says Lyndon Neri, Neri&Hu.

Offecct On Point

Designed by Mattias Stenberg

On Point is designed to allow full contact between up to eight people around it, while it's also perfect for more private and intimate gatherings among a few individuals. It's also a way of creating a micro architecture in the room, with the tree's natural ceiling that makes us feel pleasantly enveloped and comforted. On Point High, has an upholstered frame with a table top in white-pigmented oak. The center module in the middle of the table top is in lacquered MDF. It is available in different dimensions and makes it possible to fit different sizes of plants into the table.

WORKSPACE RECOMMENDATION

- Collaborative workspaces
- Spaces to connect

The tables heights make it possible to choose between standing or sitting on a bar stool. Suits many different working areas.

CONFIGURATION OPTIONS

Frame in wood upholstered in fabric or leather. Standard leather Elmo Soft. Table top in white pigmented oak laminate with bevelled edges. Center module in three different variations, outside measurement Ø500 mm. Grey lacquered MDF NCS S6500-N for O2asis with two different inside measurements 380/145 mm, alternative a full center module in grey laminated plywood. OFFECCT Osaka

Designed by Teruhiro Yanagihara

A landscape of furniture, inspired by Japanese stone gardens. The simplest forms and materials, reflecting each other and creating a jigsaw puzzle expressing both precision and clarity. Teruhiro Yanagihara's Osaka is all about reducing in order to find the core of the product. The elements of Osaka are like reflections of each other, jigsaw pieces that can be combined in different ways. Furthermore, the fabric used has a positive effect on the room's acoustics whilst the simplistic shape of the pieces mean they are easy to reupholster.

WORKSPACE RECOMMENDATION

- Collaborative workspaces (Meeting rooms)
- Spaces to connect

A flexible solution, easy to build a landscape of furniture in a room and make different spaces to have shorter meetings, supported with a variety of configurations. They are neat and easy to furnish with in different spaces – in a large entrance hall or a smaller room for a quick, spontaneous meeting. Ottomans and tables are both suitable for an active and engaging conversation.

CONFIGURATION OPTIONS

6 different designs gives you the best and easiest way of furnishing your workspace in your own way.

OFFECCT Oyster

Designed by Michel Sodeau

Oyster is an elegant easy chair inspired by the Swedes' love of shellfish. The name Oyster also suggests the idea of a place to escape to – somewhere that belongs to no-one else, even though it exists within a larger milieu. The design of Oyster weaves sensuality, comfort, and flexibility into a well-proportioned whole. The shape is inspired by the seductive shell of an oyster, and the curved armrests offer users a breathing space in the midst of a busy environment. The easy chair would suit many public spaces, such as a hotel lobby, where it would both be a beautiful object and provide a relaxing and comfortable seat. For someone looking for a place to work undisturbed, Oyster offers an inviting retreat. Protecting the environment is a priority for both Offecct and Michael Sodeau. The environmental perspective has been key throughout the development of Oyster, resulting in a more efficient use of materials. Despite its considerable size, the easy chair requires a relatively small amount of material in production.

WORKSPACE RECOMMENDATION

- Space to focus
- Collaborative workspace

The easy chair would suit many public spaces, such as a hotel lobby, where it would both be a beautiful object and provide a relaxing and comfortable seat. For someone looking for a place to work undisturbed, Oyster offers an inviting retreat.

OFFECCT Palma

Designed by Khodi Feiz

Palma is inspired by the cupped palm of a hand, symbolically cradling the body that sits in it. The chair's elegant form is captured in the seat, backrest and armrests as a single graceful movement. With its frame of molded birch veneer and seamless upholstery, Palma features an extremely elegant design. Above all, Khodi Feiz and Offecct have endeavored to develop a chair with a long lifespan. It must be able to withstand wear and remain appealing to the eye. The chair is clearly informal. Feiz would like to see it used in the home as well as featuring in a professional conference room. He designed the chair to work as a freestanding piece that can also be grouped around a table to give the room a unique configuration.

WORKSPACE RECOMMENDATION

· Spaces to connect

The easy chair would suit many public spaces, such as a hotel lobby, where it would both be a beautiful object and provide a relaxing and comfortable seat.

OFFECCT Playback Sofa

Designed by Claesson Koiviso Rune

Playback is a module sofa that combines playfulness and tight elements. Playback is characterized by the opportunity to choose different fabrics and colours for the frame and cushions. Furthermore, each individual can give the sofa its own character by changing the movable cushions in the back. "I wanted to create a piece of furniture that give the architect and the interior designer complete freedom to compose and adapt it to their own wishes. Despite the tight lines and the rather strict linear form the variation and the rounded cushions gives the sofa its soft, playful and comfortable character", says Claesson Koiviso Rune.

WORKSPACE RECOMMENDATION

- Spaces to connect

Playback fills an important role in the range of elegant and super functional sofas for the contract market. Can be used in many ways and rooms.

CONFIGURATION OPTIONS

Legs in Offecct Flexicolor. Pillows quilted can be ordered in selected patterns, Beta alternative Delta. Contrast seams are available in colors; Beige, black, brown, dark blue, dark green, dark grey, grey, neon green, neon orange, orange, red and white.

Offecct Shift

Designed by Daniel Debiasi & Fredreco Sandri

Shift is an exceptionally flexible armchair, through the different heights of the backs, allows everyone to both focus completely on their work and to rest completely. The backrests can be replaced and renewed as needed. Frame in metal with molded cold foam. Fully upholstered. Frame in steel or wood.

WORKSPACE RECOMMENDATION

- Collaborative workspaces
- Spaces to connect

Our offices and ways of working have changed, towards increased flexibility and more but smaller spaces for physical and digital meetings. The Shift armchair are designed for use in such soft, adaptable work spaces.

CONFIGURATION OPTIONS

Different heights of the backs. The backrests can be replaced and renewed as needed. Frame in metal with molded cold foam. Fully upholstered. Frame in steel or wood. Frame in Flexicolor RAL system.

Offecct Smallroom

Designed by Ineke Hans

Smallroom can be used together in different modules or standing alone. The design of Smallroom is characterized by a "box" on the side which can be used as a working surface with optional power devices. The back of the sofa can be compared to a high wall functioning as a sort of protection when one is seated, and creates the impression of a smaller room. However, the height of the back is not compromising with the volume of the surrounding room. Smallroom is offered with different back and side heights, which provide the architect a possibility to create environments that evoke interest, through the help of different dimensions. Frame in wood. Cold foam. Fixed upholstery in fabric or leather. Standard leather Elmo Nordic. Legs in chrome with ABS glides.

WORKSPACE RECOMMENDATION

- Space to focus
- Collaborative workspaces

We often talk about active areas; where different kinds of work, conversations and meetings can take place. Smallroom is developed in accordance with this and invites individually or group activities at work.

CONFIGURATION OPTIONS

Legs in flexicolor, electric socket, powerbox, USB, table in wenge or ash. The sofa collection is 3 different designs.

Offecct Sou

Designed by Teruhiro Yanagihara

Sou has 7 different options; with tables or armrest plus 1-seater for making U-shapes or corners. Since the seat and backrest are separated, you can choose different colours of fabric or different finishes on the table part. Leg frame in solid wood: white stained ash or black stained. Inside frame back and seat: solid wood, birch plywood and fiber board. Polyurethane foam glued to frame. Non-glued upholstery which can easily be re-upholstered.

WORKSPACE RECOMMENDATION

- Spaces to focus
- Collaborative workspaces
- Spaces to connect

Teruhiro Yanagihara's sofa Sou, is constructed in different layers to make it possible to freely create different shapes and functions for public environments, waiting areas, or working. The possibilities are vast to create your own solution for your needs.

CONFIGURATION OPTIONS

7 different options of design with tables or armrest plus 1-seater for making U-shapes or corners. Since the seat and backrest are separated, you can choose different colours of fabric or different finishes on the table part.

Offecct Soundwave®

Designed by several Designers (See each panel)

The strong collection Soundwave® is a well-known collection of modern acoustic wall panels that apart from its acoustic properties also brings character to the interior. Our standard colors are offwhite, grey and anthracite, but many of the panels can be upholstered in Gabriel Europost 2. This panel helps reducing disturbing reflections of environmental sounds such as voices, telephones etc. Recyclable moulded polyester.

WORKSPACE RECOMMENDATION

· All areas, Collaborative meeting spaces, waiting areas, or private work-study spots

Sound pollution spoils the atmosphere in a room, saps concentration, increases stress levels, and adversely affects how we feel. This is a problem that is growing with the increasing tendency towards larger rooms and open-plan solutions. To improve creativity and well being by combining sound absorbing products you will have the best result.

CONFIGURATION OPTIONS

15 different designs of Soundwave, some with basfill for even better acoustic sound absorption. Some design available upholstered in Gabriel Europost.

PROFIM Revo

Designed by Pearson Lloyd Studio

Responding to the changing way we work and the urgent need for action on climate, Revo sets new standards in both sustainability and versatility. Revo's success as a modular furniture system is down to the fact it is extremely lightweight thanks to replacing the plywood by recycled expanded polypropylene (REPP). The Revo family includes sofas, benches, screens, pouffes and tables in softly contoured, organic shapes. This versatility is in tune with the increasingly differentiated nature of the work experience.

WORKSPACE RECOMMENDATION

- Touchdown areas
- Spaces to collaborate
- Spaces to connect

The Revo family includes sofas, benches, screens, pouffes and tables in softly contoured, organic shapes. By arranging these elements in different ways, Revo can be configured to suit every workspace, whatever its function or size.

CONFIGURATION OPTIONS

Revo supports around 100 distinct modular configurations, so it can be customised to meet the needs of any space or style of work - from office to hospitality, solo to team-based, formal meeting to spontaneous collaboration, reception to break-out area. Revo's seats and screens are complemented by a range of tables of different sizes and heights, supporting a range of tasks, from focused individual work to brainstorming around the coffee table.

CONNECTION Rooms

Designed by Roger Webb Associates

The Rooms range is designed to define space and create a sense of place. Rooms needs no planning permission and has no fixed walls. It is a flexible and reconfigurable free-standing structure designed to create informal and formal workspace solutions to meet, socialise, focus and collaborate. Offering visual and acoustic privacy solutions. Rooms is available with a variety of walls to create spaces with endless functionality, these include acoustic, whiteboard, upholstered, glass and Venetian trellis walls.

WORKSPACE RECOMMENDATION

· Meeting space, collaboration workspace, focus room.

Used to create distinctive rooms in open plan spaces in workplace and educational settings. The wide range of wall options make Rooms ideal for any space, creating the zone that people need, whatever that may be.

CONFIGURATION OPTIONS

A modular structure with 4 open sides that can be built with multiple wall options. Aluminium structure with oak, OSB or coloured cladding. Multiple sizes available based on 2.4m, 3.0m and 4.0m walls.

Flokk is the leading manufacturer of high-quality workplace furniture and acoustic solutions in Europe, offering a wide range of seating solutions, tables, and accessories for working and public spaces.

Combining internal expertise with renowned designers from around the world, we create furniture designed to improve the well-being and performance of its users, to 'inspire to great work'.

Flokk has over 40 years of experience in developing environmentally friendly furniture. With a systematic approach, using an ever-increasing amount of recycled materials in our designs and following a unique set of guiding principles, our goal is to reduce both our own and our customer's environmental impact, inspiring others to do the same.
